**CONTENTS:**

1.	SCOPE.....	1
2.	QUALITY POLICY STATEMENT .....	3
3.	ROLES AND RESPONSIBILITIES.....	4

## 1. SCOPE

The scope of this Quality Policy and the associated Quality Management System applies to:

The activities related with Non-Destructive Testing of Castings, Forgings and Welds (N.D.T), Onsite 3<sup>rd</sup> Party Inspections including dimensional and surface finish reports.  
Provision of technical support for Rotating Equipment.

Manufacture of rollers, shafts etc and limited subcontract machining will be outsourced to Approved Suppliers.

We do not carry out any design work, as our clients provide full manufacturing drawings. Therefore, design is excluded from our scope of approval.

## 2. POLICY STATEMENT

At NDT Detect Inspect Ltd we will be providing services across the UK to different kind of industries, we have made ourselves aware of the local and global impacts that our operations can have on the environment.

Our Management Team strongly believes that individual small-scale inputs contribute towards huge global outputs. As such, our organisation strives to embed environmental protection within its culture and business strategy.

The organisation holds ISO 9001, (externally accredited).

By means of these tools, our organisation aims to reduce the impacts associated with the activities, products and services at any stage of the life cycle, where reasonably practicable. Accordingly, in pursuance of excellent performance, we are committed to operate in a way that ensures an effective through responsible resources supply/usage, efficient operation.

To ensure that these aims are achieved, Top Management is accountable and committed to:

- Develop, implement, maintain and continuously improve our Quality Management System in compliance with ISO 9001 2015 to manage our Quality issues and enhance performance
- Fulfil all compliance obligations, including all those legal and other requirements
- Identify all significant environmental aspects and its associated impacts; and set and regularly review objectives and targets to address those highest rated aspects
- Consider all identified risks and opportunities in the overall business strategy
- Prevent pollution by means of using Best Available Techniques (BAT), always when reasonably practicable, carrying out preventative inspection and maintenance; and keeping an adequate emergency response plan
- Keep energy usage within reasonable limits, reduce wastage (waste minimization) and manage waste in a responsible manner
- Encourage high standards of among suppliers, contractors and customers, with a life-cycle approach
- Develop the skills and competences required for all relevant staff and embed a culture of care for the environment to ensure all task are carried out in an environmental responsible manner
- Provide the resources and training required to ensure all these objectives are satisfactory met

All the members of the organisation have the responsibility to co-operate and don't interfere with the development, implementation, maintenance and improvement of the Quality Management System.

The organisation commits to adequately maintain and document this policy, to make it openly available to the public and to communicate it to the employees, contractors and suppliers.

Top Management will review this policy with an annual frequency, issuing a new version when necessary to reflect any modifications with respect the position of the organisation with regards the environment.
